

Navigating Non-Physical Needs, Trauma, and the Tech Tsunami

Online Course:
Aug. 5-Sept. 8

Learning Outcomes

- Recognize how our behavior is driven by our non-physical needs.
- Learn how smart phones, social media, and even video games tap into these needs.
- Learn some basics about new technologies like AI, AR, and VR, where this tech came from, and where it's likely to go.
- Explore the promise and peril of these new technologies in a landscape of unmet needs and trauma.
- Learn Peace Literacy tools for meeting these needs in healthy ways to better prepare for the tech tsunami.

Feedback from some of the participants earlier this year:

- “Having the vocabulary and perspective of non-physical needs in mind helps me to see the world differently and then react or interact differently. I am attempting to see the world with a different lens and change my behavior to be more understanding and compassionate.
- Watch this short [video](#) endorsement from a special ed teacher.

Registration

- Registration link [here](#); See a free preview [here](#).
- Complete work at your own pace; 3-4 hrs/week with optional weekly Zoom check-ins scheduled Thursdays at 5PM Pacific.
- Enrollment fee of \$300 includes digital workbook, certificate of completion, and professional development/continuing ed credits.
- Email joannpdeck@peaceliteracy.org for info about scholarships or how to donate to sponsor a teacher/scholar.

Co-sponsored by the Peace Literacy Institute and the Professional Development for Educators program in the College of Education at Oregon State University, with an instructional team from the School of History, Philosophy, and Religion and the School of Communication at OSU.
